☐ Continuation Sheet Attached

Brief Description of Arguments to be Presented:

The Examiner's interpretation of references shows a single local area of material being irradiated from different oblique directions simultaneously.

This differs from claim 1, where multiple areas of material are simultaneously exposed to irradiation of an oblique angle independently selected for each local area.
An interview was conducted on the above-identified application on _____.

NOTE:

This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
